So bad and empty ! No subtitles (while advertized as subtitled), no content, no more than a few minutes length, 3 choices as the full gameplay (one being the option to skip the english-voiced not-subtitled intro).

You buy it because you want to try some original indie thing, you refund it because you feel cheated by some so-called dev who doesn't know shame. Even for a low price, I don't need to buy poo.. British Narrator - Check

Ability to make choices - Check(ish)

Any humor that eclipses how annoying playing this game is - XXXXX

I wish it was way better.

-Narrator is funny

-Story is good

Cons:

-Even though there are 12 endings or something, it takes less than a minute to finish the game.

-there are only a few choices you can make

-No point in getting more than two endings because you can't skip scenes making it become tedious

Overall, the game has a neat concept but it takes under 5 minutes to achieve all one would willingly play, making the game not exactly worth the cost. However, it has potential to become a very fun game if the developers added more content and less tediousness of trying to get all the endings.
